Experience

SOFTWARE ENGINEER @ PESISTENT SYSTEMS - SEP 2021 - PRESENT
- Professional experience on **Git, Docker, API,** and **Computer Networks**

INTERN @ SUVEN CONSULTANTS - OCT 2020 (2 WEEKS INTRNSHIP)
- Worked on social media platform **backend** development using **PHP** & **MySQL**.

Education

BE 2017-2021 | CSE | SVERI'S College of Engineering, Pandharpur.

Skills & Abilities

PROGRAMMING   : Python, Core Java
WEB DEVELOPMENT   : HTML, CSS, Bootstrap, PHP, Flask, Django, JavaScript
DATABASE   : MySQL, MongoDB
OTHER   : Git, GitHub, Computer network, API, Docker

Personal Projects

MY-AWESOME-CART | SOUCE CODE | E-COMM WEBSITE
- Designed **User Interface** using **HTML**, **CSS**, **Bootstrap** and **Django template** which can request to the backend, fetch the data from the database and shows the available products to the viewer.
- Applied non-relational database **MongoDB** to store and manage products data.
- Implemented **backend** and created endpoints using the **Django** which can process the requests and returns the response in the form html content.

CLEAN BLOG | SOUCE CODE | BLOG WEBSITE | FLASK, PYTHON, MYSQL
- Developed **frontend** using **HTML, CSS, Bootstrap** and **Flask** which can call the endpoint which retrieves data from the **MySQL** database where blogs are stored and then show the available blog posts.
- Implemented **backend** using **flask**, created multiple endpoints for the admin account which can manage the blogs in the database and also created a guest user which has read only privilege.

IDISCUSS | SOURCE CODE | CODING FORUM WEBSITE | PHP, BOOTSTRP, MYSQL
- Implemented **frontend** of the iDiscuss coding forum using **HTML, CSS,** and **Bootstrap**.
- In the **backend** implemented the session and login functionality using **PHP** by which only logged in user can comment on the questions and guest users have a read only privilege, they can read all the discussions. Also implemented search functionality and category for the ease of the access.
- All the data related to forum like category, questions, answers and user details is stored in the MySQL database

CERTIFICATIONS

- Complete web development 2.0 certification course on Udemy.
- Responsive web development course on freecodecamp.
